17. Place a point at $(-4,1)$.

From this point, draw a line with a slope of $\frac{3}{4}$.

18. Place a point at $(-2,3)$.

From this point, draw a line with a slope of $-\frac{5}{2}$.

19. Place a point at $(1,2)$.

From this point, draw a line with a slope of $-\frac{2}{3}$.

20. Place a point at $(0,-4)$.

From this point, draw a line with a slope of $\frac{5}{1}$.

For 21-24, plot the points given and find the slope.
